

The Dilemma... 140,000 people die each day without Jesus. That's nearly 1 million people who die without Jesus each week. Nearly 50 million people each year die without Jesus.

Look what God is doing...

The Problem... It takes 12 to 14 months for a first term candidate missionary to reach the field. During these 14 months, 56 million people will die without Christ!

Although we have shortened the time it takes from 20 months to 14 months. Fourteen months is still too long!

We must... Give now to their cash budget. It is imperative that individuals and churches of our district begin now to pledge monthly support for these new missionaries.

The Goal... For First Term Candidate Missionaries to raise their support in 10 - 12 months.

How? If every member in our Southern Missouri District churches would give \$1 or more each month above their present missions giving, we could easily shorten the itineration time of our first term candidate missionaries.
